Mission Statement

To protect Australia's native wildlife and unique biodiversity by delivering practical, ethical and industry-leading fauna management solutions that support responsible development, minimise environmental harm and create positive outcomes for both projects and the environment.

Fauna Resources delivers specialist fauna management services to the construction, infrastructure, resources and energy sectors throughout Australia.

Our experienced fauna personnel support projects through all stages of development, providing practical wildlife management solutions that minimise environmental risk, maintain regulatory compliance and promote positive outcomes for both clients and wildlife.

Fauna Resources is incredibly proud to support Destiny Rescue in their vital mission to end human trafficking across the globe.

What we offer

Fauna Spotter Catchers

EVNT + Targeted Surveys

Koala Monitoring

Flying Fox Monitoring

Additional Fauna Services

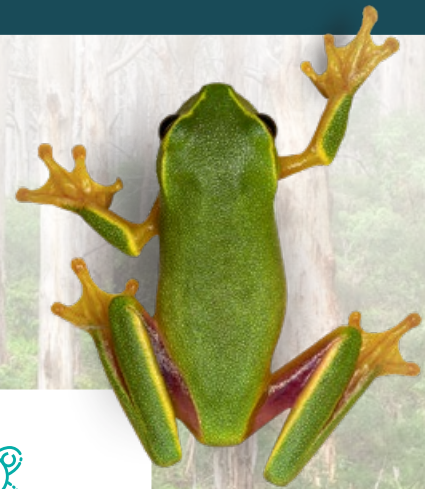

Black Cockatoo Surveys

We believe responsible development and wildlife conservation can coexist. Through proactive fauna management, we help clients minimise impacts on native wildlife while supporting the successful delivery of infrastructure, resource and land development projects.

We are committed to the highest standards of safety, professionalism and competency, investing in our people, equipment and training to ensure effective operation across a wide range of challenging environments.

We are passionate about advancing the understanding and conservation of Australia's unique wildlife, collaborating with government agencies, universities, Traditional Owners and community organisations to contribute to improved environmental outcomes and evidence-based wildlife management.

Fauna Management Services

Fauna Resources provides superior fauna management assessments, planning and services across projects of all scales, from small development sites to large infrastructure projects requiring on-site fauna specialists.

We pride ourselves on handling wildlife with minimal harm or stress, while working efficiently within our clients' timeframes, budget and project-specific environmental constraints.

Fauna Spotter Catchers

Our highly experienced and licensed Fauna Spotter/Catchers work alongside a project sites clearance team to ensure best-practice management of wildlife while working within timeframes and budget requirements.

Fauna Management Plans

With a range of specialised fauna ecologists and experienced wildlife research professionals, we provide accurate and operational fauna management plans along with species management plans specific to project sites environmental compliance conditions.

Pre-clearance Fauna Surveys

Pre-clearance fauna surveys for the identification and inspection of breeding places and the capture and relocation of wildlife to suitable areas or allocated offset sites.

Wildlife Trapping & Relocation

Our ecologists develop wildlife trapping and relocation plans using specialised equipment, ethical methods, and innovative techniques to minimise trauma throughout the program.

Threatened Species Surveys

Identification of threatened species within a project site, associated risk assessments and mitigations plans along with implementation of specific programs to best manage the species identified.

Ecological Assessments

Fauna Resources provides environmental consultants with the expertise to deliver ecological impact assessments for projects ranging from small-scale developments to major oil, gas, and mining operations across Australia.

Fauna Spotter Catchers

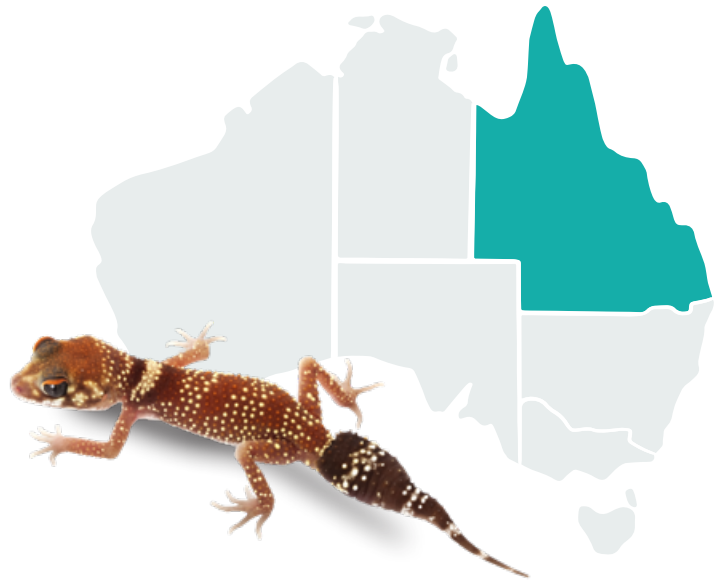

Queensland

Fauna Resources delivers specialist fauna management services throughout Queensland, supporting infrastructure, transport, energy, resources and land development projects across South East Queensland, Western Darling Downs, Central and Far North Queensland.

Our team has extensive experience working within some of Queensland's most environmentally sensitive and rapidly developing regions, where balancing project delivery with biodiversity conservation is critical.

We provide practical fauna management solutions tailored to Queensland's unique landscapes, from coastal forests and urban growth corridors to agricultural districts, gas fields and major infrastructure projects.

Our personnel are experienced in managing environmental compliance obligations associated with high-profile and protected species including Koalas, Greater Gliders, Ornamental Snakes, Powerful Owls, Glossy Black-Cockatoos, microbats, colonial nesting birds and a diverse range of arboreal and terrestrial fauna.

Fauna Resources works closely with clients across all project stages, from preclearance surveys and habitat assessments to fauna relocation, compliance monitoring and post-disturbance reporting, ensuring projects are delivered safely and in accordance with Queensland's environmental legislation.

Our practical, field-focused approach helps minimise impacts on native wildlife while supporting efficient project delivery across the State.

Fauna Spotter Catchers

South Australia & Northern Territory

Fauna Resources delivers specialist fauna management services across South Australia and the Northern Territory, supporting mining, energy, transport, defence and infrastructure projects in some of Australia's most remote and diverse environments.

From the arid west, Flinders Ranges and vast South Australian outback, to the tropical savannas and monsoon forests of the Top End, we provide tailored fauna management solutions for the unique challenges of each project and location.

Our experienced team can help manage environmental compliance obligations associated with iconic and threatened species including Greater Bilbies, Malleefowl, Yellow-footed Rock-wallabies, Northern Quolls, Gouldian Finches and Ghost Bats, along with a wide range of reptiles and arid-zone fauna.

We offer end-to-end environmental services, from pre-clearance surveys and habitat assessments to clearing supervision, fauna relocation and compliance monitoring, ensuring projects meet State, Territory and Commonwealth requirements.

Our field-based approach, combined with extensive experience operating in remote and challenging environments, allows us to deliver practical, efficient and environmentally responsible outcomes across South Australia and the Northern Territory.

Fauna Spotter Catchers

Western Australia

Fauna Resources delivers specialist fauna management services throughout Western Australia, supporting mining, infrastructure, energy and land development projects across the Pilbara, Wheatbelt, Goldfields, Mid West, South West and Perth Metropolitan regions.

We provide practical, tailored fauna management solutions to help clients manage environmental compliance obligations associated with iconic species such as Numbats, Black Cockatoos, Chuditch, Western Ringtail Possums, Pilbara Leaf-nosed Bats and a diverse variety of short-range endemic reptiles and arid-zone fauna.

From pre-disturbance surveys and fauna relocation to clearing supervision, hollow inspections and compliance monitoring, our experienced team ensures projects are delivered safely, responsibly and in accordance with Western Australian environmental requirements.

Experienced across Western Australia's most demanding environments, Fauna Resources delivers practical and environmentally responsible fauna management at any scale.

Specialised Research Services

Fauna Resources collaborates with government, universities and community groups on ecological research, advancing knowledge and management of Commonwealth and State listed threatened species.

Our research team has delivered projects ranging from the Burmese Python and Elongated Tortoise Project in Bangladesh to threatened species management plans in the Surat Basin and local government sustainability programs.

Ecological Assessments

Developing specific management plans for Threatened and other protected species, advising best management practice and requirements to meet legislative guidelines.

Species Management Plans

Developing specific management plans for Threatened and other protected species, advising best management practice and requirements to meet legislative guidelines.

Research Projects

Our research team collaborates with local government, universities, community groups and businesses on species-specific research, consultation, management plans and field monitoring.

Conservation & Monitoring

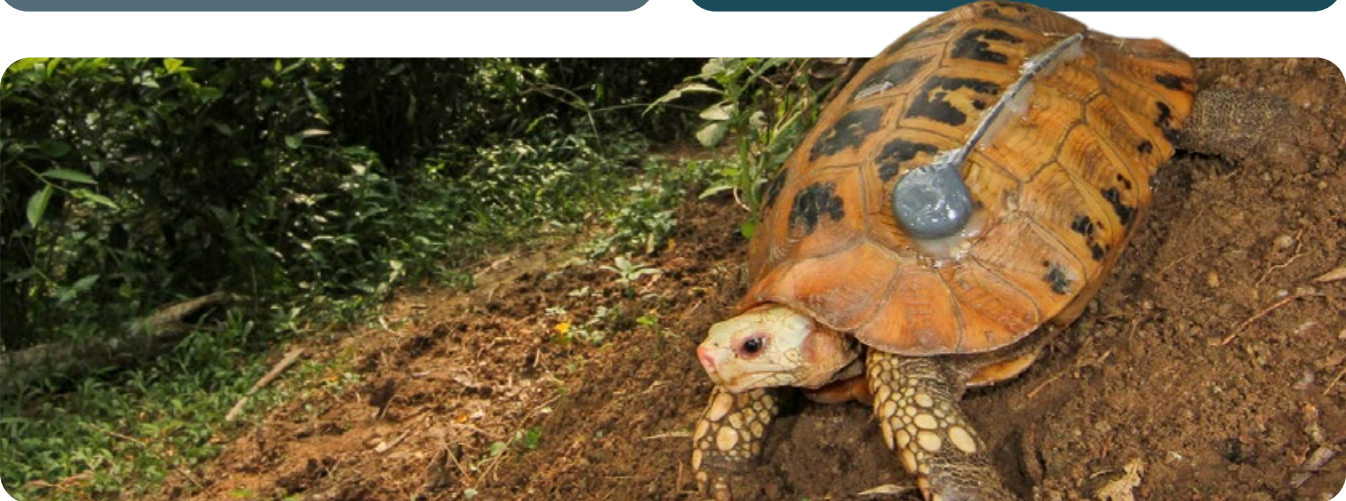

Our team is committed to conservation through monitoring and research on rare and threatened species, advancing knowledge to help sustain our environment for future generations.

Education & Training

Our ecologists and researchers provide education and training on site-specific fauna and flora requirements for field staff, including information days and workshops.

Threatened Species Research

We conduct surveys, species identification and research on threatened species, alongside risk assessments, mitigation plans and implementation programs to best manage identified species.

Project Experience

Western Power

Western Australia

Scope:

Fauna management services including targeted fauna surveys and Fauna Spotter Catcher services in support of the Clean Energy Link - North project.

ETS Infrastructure

South East QLD

Scope:

Provide Fauna Management Services for a powerline relocation at Yandina-Coolum Road on the Sunshine Coast.

Stockland Botanica

South East QLD

Scope:

Large-scale residential fauna management, delivered in partnership with a third party across Fauna Spotter Catcher and aquatic dewatering services.

BOC Gas

Surat Basin, QLD

Scope:

Provide specialised Fauna Management Services on the BOC LNG Condamine Project in the Surat Basin in conjunction with Murphy Pipe & Civil.

MPC Kinetic

Surat Basin, Western QLD

Scope:

Fauna management for MPC Kinetic's Surat North Upstream Project, compliant fauna relocation and best-practice ecological solutions.

Sunshine Coast Council

South East QLD

Scope:

Conducting surveys and data analysis to support the Flying-fox Monitoring Program on the Sunshine Coast.

Project Experience

Synergy

Western Australia

Scope:

Fauna management including preclearance surveys and Fauna Spotter Catcher services supporting road widening for the King Rocks Wind Farm project.

Ertech

Central West QLD

Scope:

Fauna Spotter Catcher and bird relocation services for Ertech's Landsborough Highway upgrades.

Ertech

South East QLD

Scope:

Fauna and flora management services in support of the Mooloolah River Interchange Upgrade project on the Sunshine Coast.

MPC Kinetic

Surat Basin, QLD

Scope:

Provide ongoing Fauna Management Services on Gas Fields Services Contract on the QCLNG Project in the Surat Basin.

Sunwater

Surat Basin, QLD

Scope:

Fauna Spotter Catcher services for Sunwater's Woleebee Creek to Glebe Weir Pipeline, wildlife relocation and compliance.

Decmil

Surat Basin, Western QLD

Scope:

Fauna management services for the QCLNG Upstream Pipeline, delivering compliant, fauna solutions across the Surat Basin.
